## neutralisation units

The Chemical Processing Industries are diverse, as are the challenges to provide the safest and most environmentally sound solutions to aggressive fluid handling applications.

Plastic Constructies R. Teblick can provide engineered solutions for the most difficult process and wastewater treatment applications. Whether your requirement is simply for a component, or your need a complete design-build team for an installed system, our company can provide the quality products and services right for you.

Teblick designs, fabricates, and installs a full product line of chemical handling systems with proven reliability. We offer custom-designed systems to meet the challenges of the most demanding clients and facilities. Working closely with customers, our highly trained engineers will study your requirements and offer a treatment technology or recovery system specifically tailored to meet your needs.

From start to finish, Teblick can provide feasibility studies, system design, fabrication, installation, start-up, training, and service..

For the pharmaceutical sector, several acid neutralization units, pH control modules and decontamination systems have been build, used in both batch and continuous flow modes.

Depending on the needs, our systems can consist of a treatment tank, process mixers, a catalytic reactor, heat exchangers, exhaust gas filters, stack flares, liquid knockout vessel, storage tanks and fully equipped electrical cabinet.

We develop the solution to satisfy your treatment needs.
