## plastic machining services

Teblick produce high quality parts in a wide range of Plastics, matched to your specifications with 100% on time deliveries.

With CNC tools available including CNC High Speed Cutter, CNC routers, CNC milling machines and CNC lathes, Teblick is very well equipped to deal with all its customer's requirements, be they one-off special-ist pieces or larger batch runs.

Teblick utilizes the latest CAD/CAM software to maximize our CNC machining services. When coupled with our CNC spindle speeds of 12,000 RPM and performance accuracies of .0001" we offer world class CNC machining.

The company's CAD/CAM facility allows customer's own file drawings to be sent by email. And with 3D drawing available customers can see exactly what the product is going to look like before machining takes place.

Plastic Constructies R. Teblick has over 40 years of plastic machining experience. Teblick's extensive knowledge of thermoplastic engineered materials allows our staff to guide you in your decision. When invited to participate in your custom machining project we will offer material, design, and prototyping recommendations.

There is no welding technique our skilled and certified personnel cannot master, and this we combine with an excellent pre- and after-service, right up to delivery and safe installation.

When you choose Teblick, you can expect the best in plastic machining services and plastic welding techniques. The perfect combination for the production of your plastic parts.
